

Every Faculty of Science program scored on the COMPASS durability rubric — ten dimensions plus an **Irreplaceability** premium, each 0–3, to a **/36** total on a four-band scale. The faculty is **structurally strong**: Domain Depth averages **3.0/3** and all 11 programs sit in **MODERATE**. The gap is narrow and specific — **AI Literacy 1.1/3** and **Outcome Evidence 1.1/3** are the only weak dimensions across the portfolio.

AI Literacy /3 — weakest

PROGRAM	SCORE	BAND	AI LIT	OUTCOMES	WEAKEST DIMENSIONS	→28
Master of Climate Science	26 _{/36}	MODERATE RISK	1/3	1/3	AI Literacy, Outcome Evidence	+2
Master of Science (Physics)	25 _{/36}	MODERATE RISK	1/3	1/3	AI Literacy, Outcome Evidence	+3
Master of Science (BioSciences)	25 _{/36}	MODERATE RISK	1/3	1/3	AI Literacy, Outcome Evidence	+3
Master of Science (Chemistry)	25 _{/36}	MODERATE RISK	1/3	1/3	AI Literacy, Outcome Evidence	+3
Master of Biotechnology	24 _{/36}	MODERATE RISK	1/3	1/3	AI Literacy, Outcome Evidence	+4
Master of Science (Earth Sciences)	24 _{/36}	MODERATE RISK	1/3	1/3	AI Literacy, Human & Relational	+4
Master of Data Science	24 _{/36}	MODERATE RISK	2/3	1/3	Outcome Evidence, Automation Exposure	+4
Master of Science (Bioinformatics)	24 _{/36}	MODERATE RISK	1/3	1/3	AI Literacy, Outcome Evidence	+4
Bachelor of Science	23 _{/36}	MODERATE RISK	1/3	2/3	AI Literacy, Human & Relational	+5
Master of Environmental Science	23 _{/36}	MODERATE RISK	1/3	1/3	AI Literacy, Outcome Evidence	+5
Master of Food Science	21 _{/36}	MODERATE RISK	1/3	1/3	AI Literacy, Outcome Evidence	+7

The twin gap is fixable

AI Literacy sits at 1/3 in ten of 11 programs. Outcome Evidence sits at 1/3 despite real QILT employment data already in the system — a **data-folding gap, not an outcomes gap**. Closing both is a curriculum decision, not a structural rebuild.

Closest to resilient · the exemplar

M. Climate Science (26) sit 2–2 points from RESILIENT. **Master of Data Science** is the only program above the AI-literacy floor (2/3) — proof the gap is closable through curriculum.
